Unit Features

- Stacked Configurations: All panels are contained within the frame. At least one panel is stationary with bi-parting doors having two stationary panels. When open, operating panels stack over the stationary panels. (available with Corner Door)
- Pocket Configurations: All panels operate with at least one pocket. Bi-parting doors will have two pockets. When opened, all panels are concealed within the pocket. (available with Corner Door)
- All Door units are shipped knocked-down (KD).

Frame:

- Frame is 1 31/32" (50) thick.
- Frame consists of jamb (s), head jamb, and sill tracks.
- Standard is treated non finger-jointed bare pine to the interior and clad extruded aluminum to the exterior. Frame core is Ultrex with extruded Aluminum connectors.
- Alternative wood species include Mahogany, Mixed Grain Douglas Fir (Frame Only), Vertical Grain Douglas Fir (Frame and Panel), Cherry and White Oak.

Sill:

- Three sill options are available: Standard Flush Sill, Performance, High Performance (not available on Corner Doors). All sill types require a pan to be installed on site and must equal the height of the interior sill liner.
- Sill material is glass filled polyurethane and is available in Bronze or Beige. Aluminum sill liners and track covers are color matched to sill.
- Standard Flush Sill is designed to be installed onto any floor foundation; has interlocking tracks to ensure parallelism for multiple tracks. Nominal sill height is 3/4" (19) and nominal width is 3 1/64" (77) for each sill track.
- High Performance Sill uses the Flush Sill with an exterior liner and sloped shim system. The sill has a nominal height of 2 7/16" (62) and a nominal width of 3 1/64" (77) for each sill track. A wood sloped wedge with counter shims will be provided to allow for water drainage.
- Performance Sill uses the Flush Sill with an interior liner. The sill has a nominal height of 1 13/16" (46) and nominal width is 3 1/64" (77) for each sill track.
- Sills included an exterior weep for water, weeps must remain clear and free of obstruction.

Panel:

- 2 1/4" (57) thick-nominal with doweled fastened corners.
- Stiles and Rails are 4 3/4" (121).
- Stiles are LVL (laminated veneer lumber) core with non finger-jointed, bare pine veneer on interior. Preservative treated.
- Rails are finger-jointed/edge glued core with non finger-jointed, bare pine veneer on interior. Preservative treated.
- Wood glazing cap is applied to interior with vinyl glazing bead. Standard profile is Ogee with option of Square.

Hardware:

- Each operating panel has a set of stainless steel tandem rollers. Each roller is a tandem configuration that equal four rollers per panel that support the weight of the operating panels during motion.
- Maximum panel weight is 600 pounds with a set of tandem rollers.
- Handle set:
 - Interior Active recessed, mounted handle: Intuitive thumb latch that engage/disengage the multi-point locks of the panel. Also provides a recess finger pull area on the active panel, all handles are non-handed. Default finish is Oil Rubbed Bronze PVD, optional Satin Nickel PVD and Matte Black.
 - Interior Inactive flush mounted handle: Provides a recessed finger pull area on the inactive panel. It differs only from the active handle in that it doesn't have a slide lock actuator.
 - Exterior, recessed pull, non-keyed: Provides a recess to push/pull the primary active and inactive panels to the open or closed position. Handles are non-handed and are not keyed for exterior locking. Keyed lock is not available. Default is Bronze PVD, optional Satin Nickel PVD and Matte Black.
 - Handle positioned lower on units with a frame height size less than 62 3/64" (1576mm)
- Manual Flush Bolt: For bi-parting and Corner Doors only, a brass substrate with brushed chrome finish on trim cover flush bolt. That is at the top edge of the inactive panel, only accessible when the primary panel is open. The flush bolt secures into a strike mounted in the head jamb.
- Panel Edge Pull is a pivotal finger pull that provides a means to pull the panels from the pocket. Applied to the meeting stile edge of the active and inactive panel(s). Available on pocket units only. Corner units receive panel edge pull on active panel only.
- Panel Bumpers: Provides a method of opening multiple operating panels from the active panels. Bumpers are a steel substrate with bronze painted finish and black rubber bumpers.

Weather Strip:

- Color is bronze/black or beige, color will follow the sill color. All units are constructed with vinyl weather strip at the panel perimeter and interlocks. Weather Strip exposed to the exterior is UV resistant material.

Unit Features Continued**Glass and Glazing:**

- Glazing seal: Silicone glazed
- Standard glass: Insulating Dual Pane Low E2 with Argon or Air
- Gas Fill: Air or Argon
- Dual-pane insulating glass thickness: 15/16"
- Triple-pane insulating glass thickness: 1 1/4"
- Insulating glass coatings:
 - Low E1
 - Low E2
 - Low E3
 - Low ERS
 - Low ELR
- Available glass types:
 - Laminated
 - Tempered
 - Obscure
- Tints:
 - Bronze
 - Gray
 - Green
 - Reflective Bronze
- Decorative glass options:
 - Tempered Sandblasted
- All glass is of select quality complying with ASTM C 1036. Tempered or Laminated safety glazing per CPSC 16 CFR 1201. Insulating glass is manufactured and tested to pass level ASTM 2190 and is IGCC certified.
- IZ3 has tempered exterior pane
- For additional specialty glazing options, please contact your Marvin representative.

Lock Status Sensor (Optional):

- Refer to **Lock Status Sensor Installation Instructions** for requirements.
- To achieve a closed and locked status, the Lock Status Sensor requires that the door must be closed to depress the anti-slam mechanism so that the door can be manually locked. It allows easy integration with home automation systems using a wireless connection.
 - Requires purchase of secondary transmitter for operation. Marvin will prep for this option. Wired connection not available.
- Wireless Lock Status Sensor is located within the operating panel.
- Sensor Location will always be routed into the door stile, under the lock bar.

Unit Features Continued**Sliding Door Automatic Control:**

- Sliding Door Automatic Control provides motorized panel operation on Marvin's Ultimate MultiSlide Door. Refer to [Site Prep Guide](#) for requirements.
- Interior Wall Switch is wired. For wired switch, check with local codes on potential contractor requirements for low voltage networking connections.
 - Wall Switch:
 - Interior: 9-in-1 touch screen with programmable background colors
 - Exterior: Wired wall switch with numeric keypad available in Black and White
 - Wired Motion Sensor will be placed in the head jamb cover adjacent to the primary panel, centered over the primary panel on a unidirectional door or centered over the meeting stiles on a bi-parting door.
 - Optional: wired interior motion sensor
- Motor Location
 - Uni-directional Units - Locking Jamb side
 - Bi-parting Units - Left or Right Hand (from exterior)
- Home Automation Connectivity allows easy integration with home automation systems.
- Sliding Door Automatic Control not available on Corner Doors.

Abbreviations

- Ultimate MultiSlide Door - UMSD
- Ultimate MultiSlide Stacked Door - UMSD STK
- Ultimate MultiSlide Pocket Door - UMSD PKT
- Ultimate MultiSlide Stacked Corner Door - UMSD STK CNR
- Ultimate MultiSlide Pocket Corner Door - UMSD PKT CNR

Operations

- Door handing is viewed from exterior.

P = Pocket

X = Operating

O = Stationary

L = Left handed bi-parting unit

R = Right handed bi-parting unit

Examples of operating descriptions:

- 4 panels, moving left into a pocket.
 - PXXXX UMSD PKT
- 3 panels, two of which move to left for stacking.
 - OXX UMSD STK
- 6 panels, three moving in each direction into a pocket. The primary panel on the right group of three panels.
 - PXXX-XXXP R UMSD PKT
- 8 panels, with three moving in each direction for stacking. The primary panel is in the left group of four panels.
 - OXXX-XXXO L UMSD STK
- 3 panels on one side stacked, corner, 4 panels on the other side pocket.
 - OXX-C-XXXXP

Unit Features Continued

Configurations:

- Maximum of 3 panels in center stacked units.
- Maximum of 6 panels in uni-directional.
- Maximum of 10 panels for bi-parting and Corner doors.
 - Can mix pocket and stacked configurations on either side of the corner with one exception. Single track pocket units can only be attached to another single track pocket, eg PX-C-XP.
- Break away and operating forces will vary with panel size and panel quantities within a unit.

NOTE: Additional panels are available through special order, but limited by safety, production and shipping capabilities.

Uni-Directional Stacked:

- 2 panel door unit OX / XO
- 3 panel door unit OXX / XXO; XOX
- 4 panel door unit OXXX / XXXO
- 5 panel door unit OXXXX / XXXXO
- 6 panel door unit OXXXXX / XXXXXO
- 2-5 panel configurations available per elevation for Corner Doors

Bi-Parting Stacked:

- 4 panel door unit OX-XO L or R
- 6 panel door unit OXX-XXO L or R
- 8 panel door unit OXXX-XXXO L or R
- 10 panel door unit OXXXX-XXXXO L or R

Uni-Directional Pocket:

- 1 panel door unit PX / XP*
- 2 panel door unit PXX / XXP
- 3 panel door unit PXXX / XXXP
- 4 panel door unit PXXXX / XXXXP
- 5 panel door unit PXXXXX / XXXXXP
- 6 panel door unit PXXXXXX / XXXXXXP
- 2-5 panel configurations available per elevation for Corner doors

Bi-Parting Pocket:

- 2 panel door unit PX-XP L or R*
- 4 panel door unit PXX-XXP L or R
- 6 panel door unit PXXX-XXXP L or R
- 8 panel door unit PXXXX-XXXXP L or R
- 10 panel door unit PXXXXX-XXXXXP L or R

* This configuration is not available with the Performance Sill due to the inability to install the panel from the interior.

NOTE: PX-C-XP is the only corner door configuration with a single panel option.

Interior Screen:

- Retractable Screen SE4
 - Screen Frame color:
 - Standard: White, Bronze, Black, and Clear Anodized.
 - Options: Screen sill will default to the screen color, but screen sills can be any of the three colors.
 - Handle Pull colors: Black and White
- Screen mesh: Charcoal, Vinyl-coated polyester
- Uni-Directional Screen:
 - Open from left to right or right to left
 - Maximum Screen Frame OM Width is 152 17/64" (3868)
 - Not available on bi-parting door
- Bi-Parting Screen:
 - Two screens open from each side and meet together
 - Maximum Screen Frame OM Width is 296 17/64" (7525). Maximum Screen OM Height for all configurations is 125 5/32" (3179)
 - Not available on Corner Doors.

Standard Divided Lite Option

NOTE: Due to the inherent qualities of tempered glass, daylight gaps may be seen when using simulated divided lite bars. Daylight gaps could be visible between the internal spacer bar and surface applied bars when viewing from an acute angle to the glass on the following applications:

- Tempered glass over 72" high while using 5/8" SDL bars
- Tempered glass over 91" high while using 7/8" SDL bars.

Optional Interior Square Simulated Divided Lite

NOTE: Due to the inherent qualities of tempered glass, daylight gaps may be seen when using simulated divided lite bars. Daylight gaps could be visible between the internal spacer bar and surface applied bars when viewing from an acute angle to the glass on the following applications:

- Tempered glass over 72" high while using 5/8" SDL bars
- Tempered glass over 91" high while using 7/8" SDL bars.

5 track	1-4 7/8	(429)
6 track	1-7 29/32	(505)

Description of Measurements Used:

Rough Opening Height: Bottom of sill to 1/2" (13) above the header jamb height.

Frame Height: Bottom of sill to top of header jamb.

Net Clear Opening Height: The shortest measurement from the top of sill/sill liner to bottom surface of interior wood liner.

Flush Sill

3/4", Non-Certified

Performance Sill

3/4" with 1 13/16" Interior Liner

High Performance Sill

NOTE: Square sticking is the default for product with a short bottom rail.

Sill Details: High Performance - Stacked and Pocket Units

Scale: Not to Scale

Description of Measurements Used:

Total Rough Opening Height: 1/16" (2) below bottom of sill liner nosing to 1/2" (13) above the header jamb height.

Rough Opening Height: Top of subfloor to 1/2" (13) above the header jamb height.

Frame Height: Bottom of Sill to top of header jamb.

Net Clear Opening Height: The shortest measurement from the top of sill/sill liner to bottom surface of interior wood liner.

System Height: Bottom of sill liner nosing to top of header jamb.

Available Floor Thickness: Top of sill to top of subfloor

Uni-Directional-Net Clear Opening Width: The shortest measurement from the surface of the wood interior liner to the surface of the panel edge.

Bi-Parting Net Clear Opening Width: The shortest measurement from the surface of the panel edge to the surface of the astragal.

Section Details: Uni-Directional Pocket

Scale: Not to Scale

UMSD PKT - XXXP

Description of Measurements Used:

Total RO Width: Is 1" (25) wider than Frame OM

Frame OM Width: OM of jamb to OM of jamb.

Interior RO Width To the interior plane of the door and is 1 1/4" (32) (5 1/2" (140) for PX/XP configuration) wider than the interior frame width.

Interior Frame Width: Interior surface of pocket cover to OM of jamb.

Exterior Frame Width: Pocket interlock to OM of jamb.

Exterior RO Width: 1" (25) wider than exterior frame width.

Exterior Pocket Width: Exterior wall RO to Total Rough Opening.

Interior Pocket Width: Interior wall RO to Total Rough Opening.

Pocket Depth: Is measured from the pocket interlock attachment to the interior surface of the pony wall.

Net Clear Opening Width: The shortest measurement from the surface of the wood interior liner to the surface of the panel edge.

Section Details: Bi-Parting Pocket

Scale: Not to Scale

UMSD PKT - PXX - XXP

Description of Measurements Used:

Total RO Width: Is 1" (25) wider than Frame OM.

Frame OM Width: OM of Jamb to OM of Jamb.

Interior RO Width To the interior plane of the door and is 1 1/2" (38) (10" (254) for PX-XP configuration) wider than the interior frame width.

Interior Frame Width: Interior surface of pocket cover to interior surface of pocket cover.

Exterior Frame Width: Pocket interlock to pocket interlock.

Exterior RO Width: 1" wider than exterior frame width.

Exterior Pocket Width: Exterior Wall RO to Total Rough Opening.

Interior Pocket Width: Interior Wall RO to Total Rough Opening.

Pocket Depth: Is measured from the pocket interlock attachment to the interior surface of the pony wall.

Net Clear Opening Width: The shortest measurement from the surface of the panel edge to the surface of the astragal.
